

# MAJOR LINE

**Range :** 6 sizes (casing) and 17 sizes (capacity):

- Vertical cased model
- Horizontal cased model
- Vertical uncased model
- Horizontal uncased model

**Range of use :** Heating capacity: 1 to 11.5 kW (Eurovent rate)

Cooling capacity : 1.4 to 7 kW ((Eurovent rate)

Air flow rates from 145 to 1460 m<sup>3</sup>/h

**Use :** Major Line cased model: for vertical installation on a wall or floor or horizontal installation at ceiling level.

Major Line uncased model: for vertical installation on a wall or horizontal installation in a suspended ceiling.

**Description :** Two-material, two-colour casing

New high-performance coil design

Coil type: two or four pipe; two-pipe/two-wire

Main condensate pan made of ABS-V0

Five-speed motor wired to and available on terminal block

Scroll housing(s) made of ABS-V0. Two-piece construction for full accessibility to fan motor assembly components.

HEE impellers with airfoil blades

G3 regenerative polyester fibre filter
