

# Compact water-air rooftop units

*Cooling capacity: 106,8 to 183,1 kW  
Heating capacity: 121,8 to 226,6 kW*

**Scroll** compressors  
**R-410A** refrigerant  
Configuration **flexibility**  
Silent **operation**  
**Plug-fan** with EC HEE motor  
(optional)

## DESCRIPTION

The **Space Aqua XF** cooling units and heat pumps are autonomous water-air units with a compact monoblock, horizontal rooftop design.

They are equipped with centrifugal fans, plates exchangers, air coils, hermetic scroll compressors and electronic control with microprocessor, components optimised for the R-410A refrigerant.

These units have been designed for the air conditioning of large surface areas used for business or industry. They are quick to install and operate reliably. A vast number of options meet numerous operating demands.

All units are charged with refrigerant and are tested at the factory, verifying the correct operation of all their components.

## RANGE

- Series RXF - IXF: 2 cooling circuits, 2 compressors, 6 models:  
415 / 420 / 480 / 485 / 540 / 600
- Series RXF - IXF: 2 cooling circuits, 4 compressors, 2 models:  
650 / 720

## SERIES

### Space Aqua RXF Series

Autonomous water-air **cooling** units with a compact horizontal rooftop construction.

### Space Aqua IXF Series

Autonomous reversible water-air **heat pump** units with a compact horizontal rooftop construction.

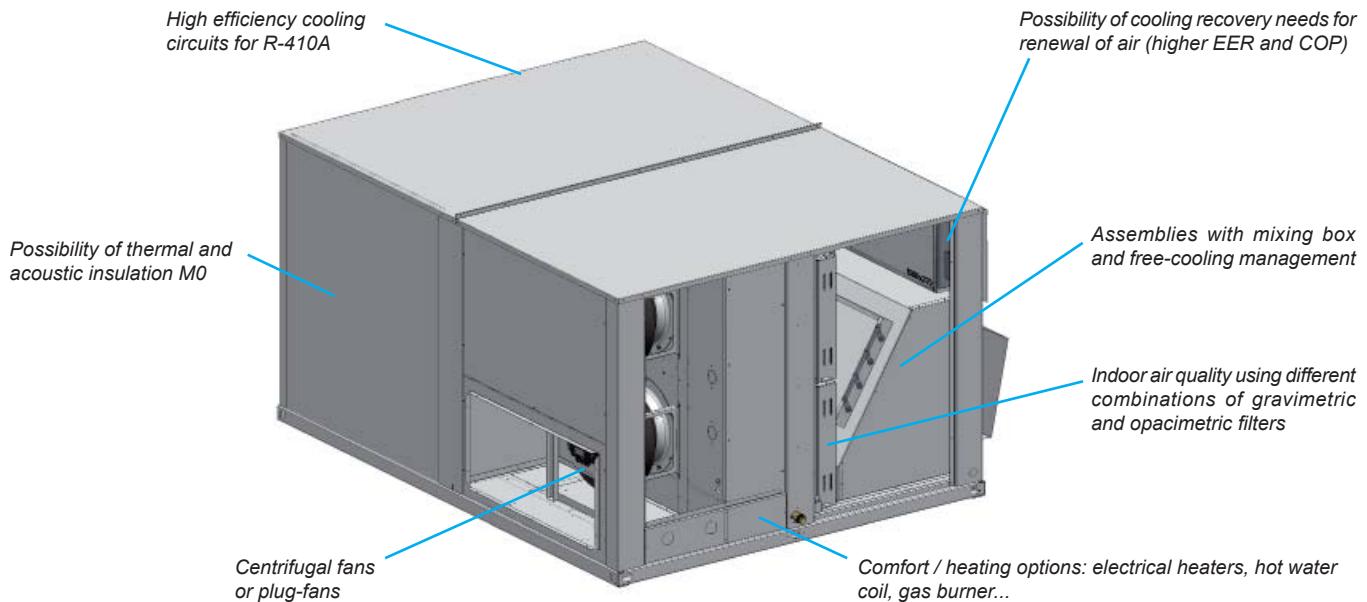

## OPERATION LIMITS

Conditions		Cooling	Heating
Air inlet	Minimum	14°C WB	10°C
	Maximum	22°C WB	27°C
Water	Minimum	5°C ①	5°C ②
	Maximum	55°C ①	35°C ②

① Temperature of outlet water.

② Temperature of inlet water.

③ Where there is risk of freezing of the plate exchanger will be required the use of glycol water.

## UNIT COMPONENTS

### Casing

- Casing made of galvanised steel metal with polyester paint, white colour RAL 7035. Thermal insulation 10 mm thick, with fire classification M1.
- Self-supporting frame and access panels to the electric panel, compressors, fans, etc.

### Cooling circuit

- Hermetic scroll-type compressors with sound insulation, assembled over antivibration mounts. Control of phase equilibrium and the direction of rotation.
- Crankcase heater (heat pump units).
- Liquid receivers.
- Four-way cycle reversing valves (heat pump units).
- Anti-acid dehydrating filters.

### Indoor circuit

- Centrifugal fan(s) coupling by pulleys and belts. Electric motors with tensioner, class F, IP55 and internal thermal protection. One, two or three double-intake turbines, with an impeller of front-curved blades. Greased spherical bearings, with no maintenance required.
- Reusable air filters, assembled on a frame.
- Coil with copper pipes and aluminium fins.
- Condensates drain pan.
- Thermostatic expansion valves with external equalisation.

### Outdoor circuit

- Welded stainless steel boards exchangers.

### Protections

- High pressure pressostat.
- Low pressure pressostat.
- Compressor discharge temperature control.
- Non-return valve built into the compressor.
- Main door switch.
- Magnetothermic protection switches for the compressor(s) power line and fan motor.
- Automatic switch in the control circuit.
- Anti-freeze protection built into the control (heat pumps).
- Water flow switch (heat pump units).
- Condensation / evaporation pressure control with three-way valve.

### Electric panel

- Complete and fully wired electrical panel. Insulated panel cover to prevent condensation.
- Protection IP55.
- Transformer for power supply without neutral in electrical panel.
- Main ground connection.
- Compressor and fan motor contacts.

# Compact water-air rooftop units

## Electronic controls

### AVANT / AVANT+ electronic control (standard)

This control is standard for all models (in the AVANT+ version).

Electronic module with microprocessor comprised of a control board and a user terminal TCO ensures the following functions:

- Selection of the operating mode:
  - HEATING ☀
  - COOLING ❄
  - AUTO Auto
  - DEHUMIDIFICATION 💧
  - FAN (without icon).
- Modification of the setpoint.
- Permanent control of the operating parameters.
- View of the values measured by the probes.
- Timing of the compressors.
- Anti-fire safety.
- Operation of all the stations via the condensation and evaporation pressure control.
- Control of the outlet temperature.
- Compressor discharge temperature control by probe.
- Compensation of the setpoint based on the outdoor temperature.
- Timer and weekly programming.

- Failure diagnosis and main alarm.
- Counters of the number of starts and operating hours of the unit's components.

Optional functions:

- Control of the auxiliary electrical heaters.
- Proportional control of a hot water auxiliary coil.
- Control of electronic fans.
- Humidity control.
- Control of the opening of the outdoor air damper.
- Management of thermal free-cooling (with the AVANT & AVANT+ versions).
- Management of enthalpic or thermoenthalpic free-cooling (only with the AVANT+ version).
- Detection of clogged filters and management of air flow.
- Connection to a centralised technical management system (BMS) for supervision.

Optionally, this control can have a terminal for pGD1 maintenance that facilitates the initial scheduling of the unit, the modification of the operating parameters and the description of the alarms produced.

### AVANT Pro electronic control (optional)

It is available for all the models of the Space Aqua XF series, being compulsory with the optionals of gas burner and cooling recovery.

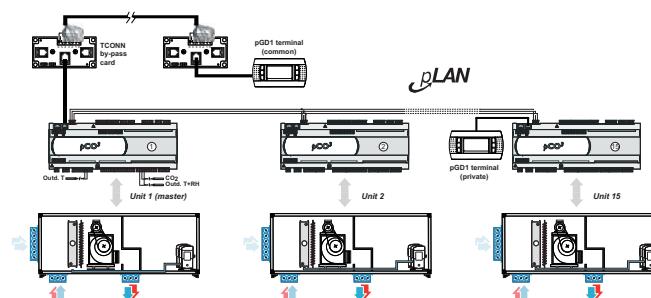

This electronic module with microprocessor comprised of a control board and a user terminal pGD1 ensures the following functions:

- Selection of the operating mode: COOLING / HEATING.
- Modification of the setpoint.
- Permanent control of the operating parameters.
- View of the values measured by the probes.
- Timing of the compressors.
- Anti-fire safety.
- Operation of all the stations via the condensation and evaporation pressure control.
- Control of the outlet temperature.
- Compensation of the setpoint in accordance with the outdoor temperature.
- Daily and weekly programming.
- Failure diagnosis and main alarm.

Optional functions:

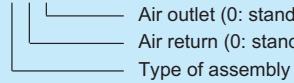

- Control of the auxiliary electrical heaters.
- Proportional control of a hot water auxiliary coil.
- Control of the gas burner.
- Management of the cooling recovery circuit.
- Control of electronic fans.
- Humidity control.
- Control of the opening of the outdoor air damper, depending on the mixing air temperature.
- Management of thermal, enthalpic or thermoenthalpic free-cooling.
- Control of the overpressure with the MC0 and MC1 assemblies.
- Management of clogged filters and control of air flow.
- Management of a smoke detecting station.
- Control of the air quality probe.
- Connection to a centralised technical management system (BMS) for supervision.
- Connection to a local pLAN network thus allowing data and information communication for a maximum of 15 units.

### Options

#### Configuration options

(Depending on the indoor air circulation)

**M<sub>wxy</sub>**

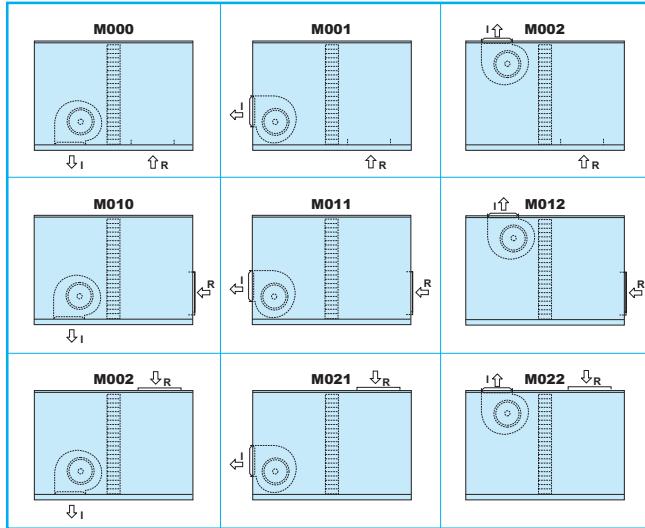

- Air outlet (0: standard, 1: optional, 2: optional)
- Air return (0: standard, 1: optional, 2: optional)
- Type of assembly

**Legend**

I = Air outlet      R = Air return      N = New air inlet      E = Air extraction

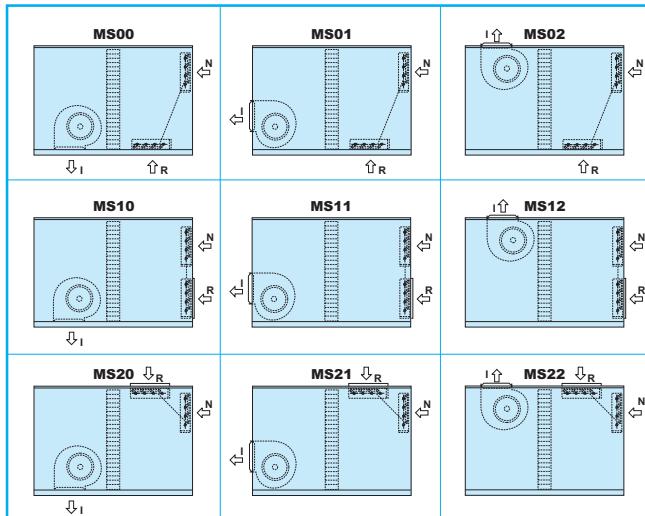

#### Standard assembly

- MO assembly:** Change of outlet and/or return air position in the indoor circuit.

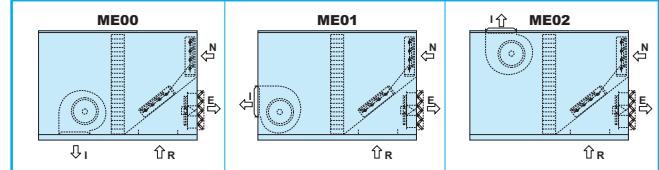

#### Assemblies with mixing box and free-cooling

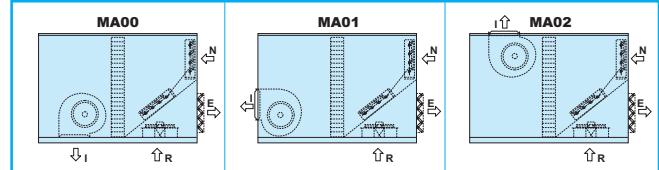

- MS assemblies:** Outdoor air intake with damper, interlocked with return damper (mixing box of 2 dampers).

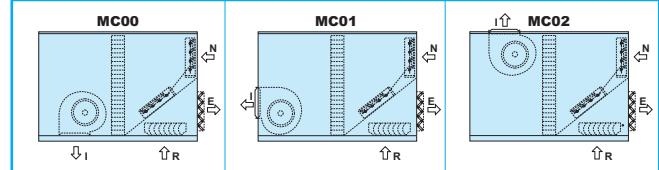

- ME assemblies:** Axial air extraction fan (mixing box of 3 dampers).

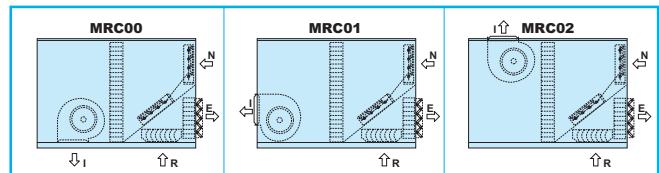

- MA assemblies:** Axial return and air extraction fan (mixing box of 3 dampers).

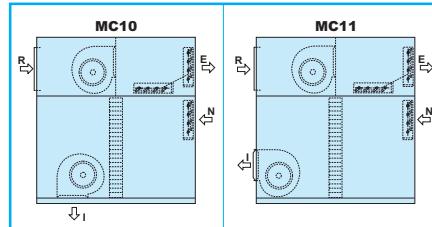

- MC0 assemblies:** Electronic lower plug-fan (mixing box of 3 dampers).

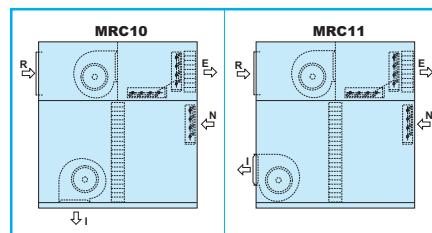

- MRC0 assemblies:** Electronic lower plug-fan (mixing box of 3 dampers) + cooling recovery circuit.

- MC1 assemblies:** Centrifugal fan in top box (mixing box of 3 dampers).

- MRC1 assemblies:** Centrifugal fan in top box (mixing box of 3 dampers) + cooling recovery circuit.

## Outdoor ambient temperature options

### Temperature

- Thermal and acoustic insulation 30 mm or 50 mm thick, with fire classification Euroclase A2-s1, d0.

*Cover loss:*

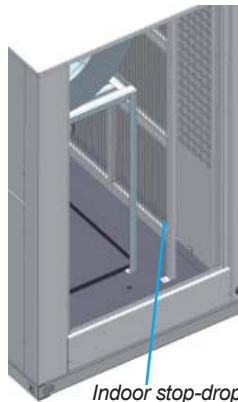

Conditions	Winter	
Indoor	20°C	50% RH
Outdoor	-20°C	94% RH
9mm NBR (std)	1790 W	2.0% HC
30mm rock wool	726 W	0.7% HC
50mm rock wool	437 W	0.4% HC

Conditions	Summer	
Indoor	27°C	50% RH
Outdoor	35°C	40% RH
9mm NBR (std)	615 W	1.00% TCC
25mm rock wool	249 W	0.45% TCC
50mm rock wool	151 W	0.24% TCC

- Electrical heater for protection of the components of the electric panel. This is compulsory if the outdoor temperature is lower than -8°C WB. With an outdoor temperature over than -16°C WB will be compulsory a reinforced resistance.
- Compressor with protection for low temperature (supplementary crankcase heater). This is compulsory if the outdoor temperature is lower than -8°C WB.
- Dampers with spring for automatic closing in case of a tension cut. This is compulsory if the outdoor temperature is lower than -8°C WB.
- Electrical heater for antifreeze protection of dampers of mixing boxes. This is compulsory if the outdoor temperature is lower than -12°C WB.
- Circuit of the hot water coil with antifreeze protection according to the water temperature. This is compulsory if the outdoor temperature is lower than -20°C WB.

### Humidity

- Stop-drop in the indoor air coil. Recommended in cases where a high moisture content in the air is foreseen or when the air flow is high.
- Stop-drop in the outdoor air intake.
- Tropicalised electric panel.
- Tropicalised motors and fans (consult).

### Corrosion

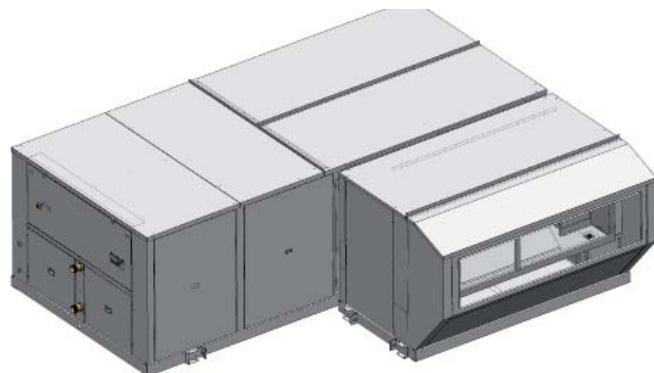

- Coils with copper pipes (indoor and/or auxiliary) and aluminium fins.
- Coils with copper pipes (indoor and /or auxiliary) and aluminium fins with polyurethane and blygold polual coating.
- Condensate drain pan for the indoor circuit in stainless steel.

## Comfort / heating options

- Hot water auxiliary coil, with three-way valve. This optional always incorporates an anti-freeze thermostat as safety system.
- Auxiliary electrical heaters, except in models 90 to 180 with top outlet. With this option, the air flow controller is compulsory to be selected. Nevertheless, if the unit with electrical heaters incorporates outlet plug-fan, it is not possible to select the optional the air flow controller, since the proper fan realizes this function.
- Natural or propane gas burner with modulating actuator, except models 415 and 480. Available for all assemblies except top and bottom outlet. With this option, it is compulsory to change the AVANT Pro, as well as the differential pressostat for controlling the air flow that stops the burner in case of fire. It is also recommended to have the differential pressostat option for detecting clogged filters.

In case of units with gas burner and outlet plug-fan it is not possible to select the pressostat for the air flow controller, since the proper fan realizes this function.

## Comfort / indoor air quality options

- Gravimetric filter G4.
- Gravimetric filter G4 of low pressure drop.
- Opacimetric folded filters F6 to F9 + gravimetric G4.
- Opacimetric folded filters F7 and F9 of low pressure drop + G4 of low pressure drop.
- Double stage creased opacimetric filters (F+F standard or F+F of low pressure drop). With this option, a technical consultation must be made due to changes in unit dimensions (MS assembly and top and bottom return).
- Air quality probe for installation in the environment or in duct to enable measuring CO<sub>2</sub> and/or volatile compounds (with AVANT Pro control, instead of the mixing probe).

Duct  
probe

Ambient  
probe

### Energy saving / recovery options

#### Compressors in tandem

- This setting improves the management of stages, and therefore the energy efficiency of the unit. Models 650 and 720 in tandem as standard.

#### Plug-fan

- Electronic plug-fans in outlet and/or return with variable speed and flow sensor. Consult dimensions schemes.

Facilities type of service industries consumption of fans associated with air transportation assumes 40 of the annual consumption of air conditioning. The use of fans of greater efficiency has a direct impact on the reduction of consumption.

Plug-fans with variable speed have associated the following advantages:

- Elimination of friction loss of the transmission by direct link.
- Greater efficiency aerodynamics of the rotor (impeller jet with optimized profile), with available pressures higher than 1000 Pa.
- Greater efficiency of the motor, DC motors of permanent magnets powered by electronic switching integrated in the motor.
- Variable speed that allows to keep the outlet flow constant regardless of the degree of clogging of filters.
- Accurate measurement of flow, a section calibrated in the fan aspiration and a differential pressure sensor allow control handling flow reliably both on VAC as VAV systems.

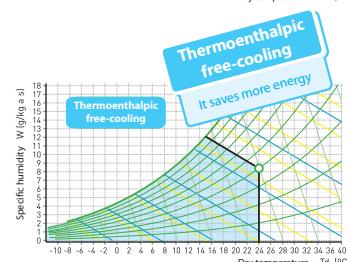

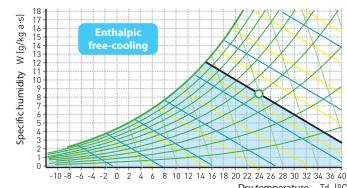

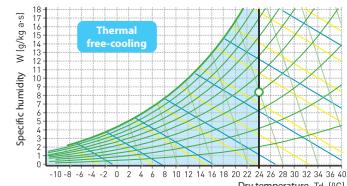

#### Free-cooling management

The operation of the unit in free-cooling allows the outdoor air conditions to be taken advantage of when these are more favourable than those of the return (or ambient) air. As such, this allows the cooling capacity to be reduced under these circumstances.

The percentage of air refreshing will range from 0% to 100%.

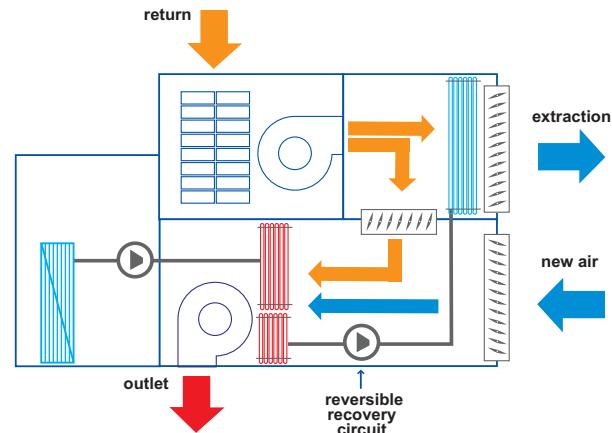

There are three options for the free-cooling management:

- Thermal, with comparison of temperatures.
- Enthalpic, with comparison of enthalpies.
- Thermoenthalpic, with comparison of enthalpies and a correction for temperature.

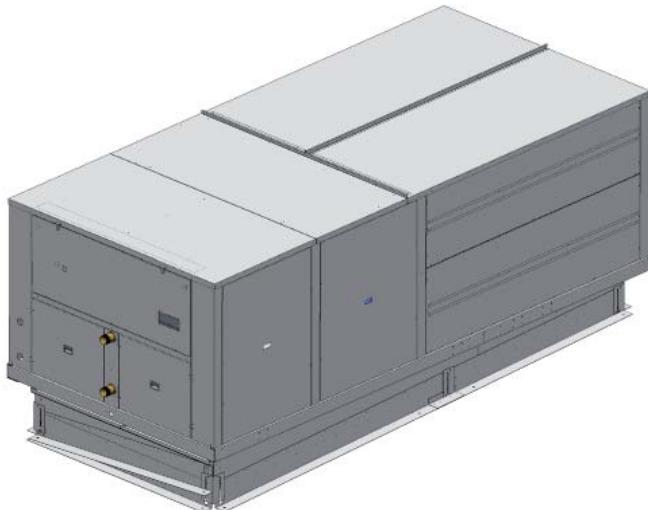

#### Active recovery

- Circuit dedicated to recovery, with independent control, adapted to the air refreshing requirements in order to raise the COP and EER of the unit set. With this option it is obligatory to change the AVANT Pro electronic control.
  - Centrifugal fan in top box MRC1 or electronic lower plug-fan MRC0.
  - Air circuit comprised of coils with copper pipes and aluminium fins.
  - Thermostatic expansion valve with external equalisation.
  - Hermetic scroll-type compressor with sound insulation, assembled over antivibration mounts.
  - Crankcase heater.
  - Four-way cycle reversing valve (heat pump units).
  - Anti-acid dehydrator filter.
  - Condensates drain pan.

## Installation options

- Outlet and/or return fan with high pressure available.
- Control of the overpressure with the MC0 and MC1 assemblies.
- Standardised pre-assembly frames made of galvanised steel panelling, thermally insulated. Adjustable height.

- Adaptation frames for replacing units on site.
- Antivibration mounts made of rubber.

## Electric panel options

- Electrical power supply with neutral.
- Energy meter.
- Numeration of components in the electrical panel.
- Numeration of wired.

## Safety options

- Soft starter of the outlet and/or return fan which prolongs the set time mainly aimed at installations with cloth ducts. Compulsory for motors with an output of 15 kW and above.
- Differential pressostat for the detection of clogged filters.
- Differential pressostat for control of air flow.
- Smoke detecting station in accordance with the NF S 61-961 standard (with AVANT Pro control).

## Packing options

- Maritime packing SEI4C (with or without gas burner).
- Skis for transporting in closed container (except with MC1 and MRC1 assemblies).

## Service options

- Commissioning and extension of guarantee of 1 year (with or without gas burner) in pieces, workforce and displacement.
- Commissioning and extension of guarantee of 2 years (with or without gas burner) in pieces, workforce and displacement.

## Control / communication options

- RS485 serial cards for network communication with protocols: Carel/Modbus, LonWorks®, BACnetTM MSTP, Konnex.
- Ethernet serial cards for network communication with protocols: BACnetTM EthernetTM, IP, SNMP V1-2-3, FTP y HTTP.
- Supervisory software PlantVisorPRO2. It's the preinstalled solution on a PC for the management and supervision of air-conditioning installations with up to 300 units. It performs advanced monitoring and maintenance functions and enables creating areas and groups which simplify the management of the installation. PlantVisorPRO2 is available in two versions:
  - PlantVisorPRO2 box: comprised of the CPU unit and, optionally, by the monitor and keyboard.
  - PlantVisorPRO2 touch: this includes the CPU and the touchscreen in the one device.

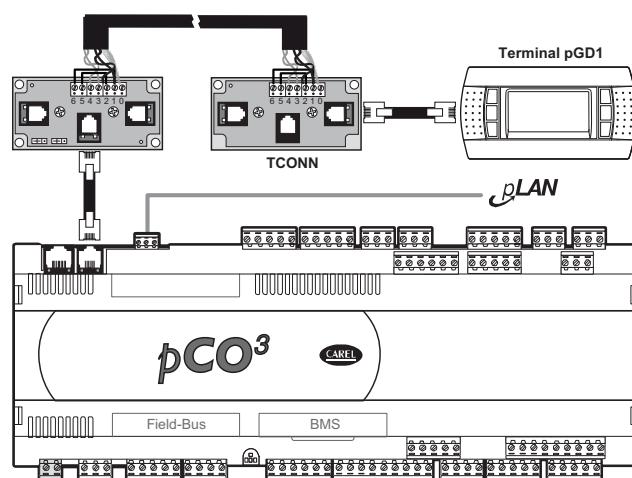

## With AVANT / AVANT+ electronic control

- pGD1 terminal for maintaining of the unit.
- Return or ambient air temperature probe connected to the board that replaces the room probe of the thermostat TCO. This probe is required for fire safety.

## With AVANT Pro electronic control

- Control without pGD1 terminal (for units with shared terminal).
- Kit remote control to 200 meters (pGD1 terminal + 2 TCONN bypass cards).
- Ambient air temperature probe: compulsory in units with gas burner.
- Ambient air enthalpy probe: compulsory in units with gas burner + enthalpic or thermoenthalpic free-cooling.
- Relative humidity probes of return and outdoor air: compulsory in units with enthalpic or thermoenthalpic free-cooling.

① Cooling capacity calculated in accordance with the UNE-EN-14511 standard given for inlet/outlet water temperature conditions of 30/35°C and indoor air temperature of 27°C (19°C WB).

② Heating capacity calculated in accordance with the UNE-EN-14511 standard given for inlet water temperature conditions of 15°C and indoor temperature conditions of 20°C.

③ Total power input by compressor and motorised fans under nominal conditions, calculated in accordance with the UNE-EN-14511 standard.

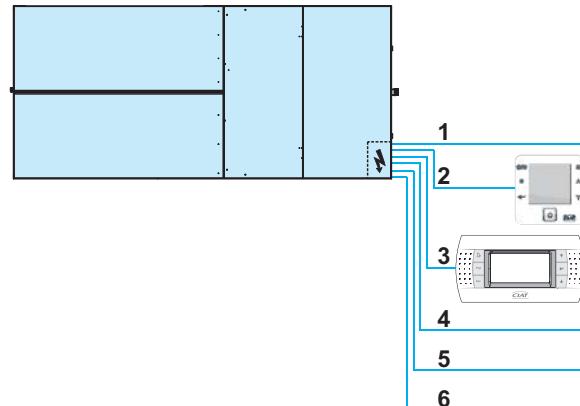

④ Climatic warming potential of a kilogram of fluorinated greenhouse gas in relation to a kilogram of carbon dioxide over a period of 100 years.

## PRESSURE DROP IN THE EXCHANGER

## ELECTRICAL CONNECTIONS

Nº	Space Aqua XF		415 to 720
1	Main power supply	400 III ( $\pm 10\%$ )	3 + T
2	TCO user terminal connection ①		2 wires for power supply 230V + 1 shielded cable for communication type AGW20 / 22 (1 braided pair + drainwire + shielding)
3	pGD1 maintenance terminal connection		telephone cable 6 wires standard (RJ12 connector) (opt.)
4	Remote off/on (optional)		2 wires
5	Main failure signal (optional)		2 wires
6	Safety electrical heaters (optional)		2 wires (per stage)

① The same power supply used for powering the control board must also be used for powering the terminal.

## OPTIONS FOR THE INDOOR CIRCUIT

### Stop-drop in the indoor air coil

Air flow at which it is recommended to install a stop-drop in the indoor coil.

Space Aqua XF		415	420	480	485	540	600	650	720
Maximum air flow without stop-drop	(m³/h)	27.700	30.090	27.700	30.090	30.090	30.090	37.030	37.030

**Note:** For operating conditions with high dehumidification in the indoor coil (e.g. in installations close to the coast) it may be necessary to install a separator even if the flow is less than the previous one.

**Note:** With hot water coil it is not possible to assemble the stop-drop.

Note: With this option, it is obligatory to change to AVANT Pro electronic control.

# Compact water-air rooftop units

## Space Aqua XF

### OPTIONS FOR THE INDOOR CIRCUIT

#### ■ Electrical heater

With this option, the air flow controller is compulsory, if the unit does not incorporate outlet plug-fan. Nevertheless, if the unit incorporates outlet plug-fan, it is not possible to select the optional air flow controller, since the proper fan realizes this function.

**Auxiliary 2-stage electrical heaters for assembly and connection inside the unit.**

Space Aqua XF	Total output (kW)	36	45	54	72
	Stage power (kW)	18 + 18	18 + 27	27 + 27	36 + 36
Current (A) (400V / I/ph / 50Hz)	415 / 420 / 480 / 485	52,0	65,0	78,0	unavailable
	540 ①	unavailable	65,0	78,0	104,0
	600 / 650 / 720 ②	unavailable	65,0	78,0	104,0
Module weight (kg)		24,1	28,9	33,6	48,3

① With outlet plug-fan it is not possible to select electrical heater of 72 kW.

② With high pressure outlet plug-fan it is not possible to select electrical heater of 72 kW.

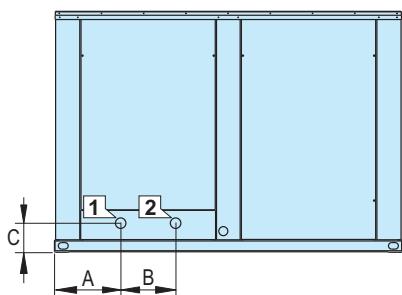

#### ■ Hot water auxiliary coil

Space Aqua XF		415	420	480	485	540	600	650	720
Air pressure drop	(mm.a.c.)	2,7	2,1	2,7	2,1	2,5	3,3	2,9	3,4
Water 80/60°C and inlet air 20°C	Heating capacity	(kW)	146,3	181,2	147,3	182,5	196	216,3	255
	Water flow	(m³/h)	6,5	8	6,5	8,1	8,7	9,2	11,3
	Water pressure drop	(m.w.c)	1,7	2	1,8	2	1,9	2,3	3,1
Water 90/70°C and inlet air 20°C	Heating capacity	(kW)	179,8	223,1	181,1	224,7	241,5	266,9	314,5
	Water flow	(m³/h)	8	9,9	8	10	10,7	11,9	14
	Water pressure drop	(m.w.c)	2,6	2,4	2,6	2,5	2,8	3,5	4,3
Weight (empty)		(kg)	43,0	66,9	43,0	66,9	66,9	66,9	82,3

**Note:** With stop-drop in the indoor air coil it is not possible to assemble the hot water coil.

**Note:** This option always incorporates an antigel thermostat as safety system.

#### Position of the hydraulic connections of the hot water auxiliary coil (optional)

Space Aqua XF	A (mm)	B (mm)	C (mm)	Ø hydraulic connections: I/O
415 to 720	302	250	222	2"

LEGEND	
1	Water outlet
2	Water inlet

**Note:** The input / output connections of the coil are located inside the unit. The connection can be established via the unit base using flexible tubing or via the side panel. In the above diagram, the position of the sheet metal precuts is shown on the side panel. To connections for the base to consult pre-assembly frames schemes.

## OPTIONS FOR THE INDOOR CIRCUIT

### ■ Gas burner

Natural or propane gas burner with proportional 0-10V actuator. Condensation boiler with premixing and modulation technology that allows outputs close to 105% with regard to the lower heating value (LHV).

The **AVANT Pro** control (compulsory for gas burners) shall manage the connection of the burner, in heating mode, via an ON/OFF signal.

- In cooling-only units, the control will activate the burner the same way as an electrical heater stage.
- In heat pump units it is possible to select three different operating modes:
  - After the compressors as an electrical heater stage.
  - Instead of the compressors.
  - Instead of the compressors if the outdoor temperature is less than the value marked on an outdoor thermostat.

The control of the power will be carried out by the burner's own control in accordance with the signal received from the AVANT Pro (0-10V) control.

**Note:** with the gas burner, the differential pressostat for controlling air flow is compulsory. Nevertheless, if the unit with electrical heaters incorporates outlet plug-fan, it is not possible to select the optional air flow controller, since the proper fan realizes this function.

It is also recommended to use the clogged filter detection and anti-freeze protection options for the components of the electric panel when experiencing low outdoor temperatures (compulsory if the outdoor temperature is lower than -8°C WB).

Available in all models except for 415 and 480. It is not available in assemblies with top outlet either.

### OPERATION WITH GLYCOL WATER

Where there is risk of freezing of the plate exchanger will be required the use of glycol water.

Correction coefficients (30% MEG)	Evaporator	Condenser
Output	0,98	0,98
Cold water flow	1,05	1,05
Water flow resistance	1,15	1,10
Average working conditions	15°C / 10°C	30°C / 35°C

### Anti-freeze protection with glycol water: freezing point

Concentration %	0	10	20	30	40	50
Mono-ethylene glycol (MEG) °C	0	-3	-7	-13	-20	-29
Mono-propylene glycol (MPEG) °C	0	-2	-5	-10	-15	-21

### CORROSION BEHAVIOUR

Corrosion problems may be present in the hydraulic circuit, and in particular the plates exchangers, if the characteristics of the water and its variations are not adequate.

It is recommended that the water filling the hydraulic circuits be filtered and treated, if necessary.

The units' hydraulic circuits are made of copper pipes. The exchanger plates are made of AISI-316 stainless steel, and the material used for soldering the plates is copper.

The following table indicates corrosion behaviour for copper and the AISI-316 stainless steel with regard to water with different compositions.

**IMPORTANT:** For open-circuit installations, if it is not possible to maintain the water conditions within the values indicated in the previous table, it will be necessary to install an exchanger that separates the unit's circuit from the water circuit to be treated by using materials compatible with these characteristics, whether stainless steel or titanium.

Water content	Concentration (mg/l)	AISI 316	Copper
Organic substances		+	0
Electrical conductivity	< 500 µS/cm	+	+
